In 1992, Venerable Huili embarked on a journey to Africa. He established the first "Amitofo Care Center" (ACC) in Malawi during 2004, dedicated to caring for African vulnerable children and where more than 85% of world's HIV-positive children live. Today, many years later, the founder continues with his compassionate practice of Buddhism in Africa traveling to all corners of Africa, and helping countless precious young lives. Nowadays, he is known as the "African monk" or "Monk dad" in the eyes of thousands of children.

Amitofo Care Center 17th Anniversary in Namibia

Amitofo Care Center's anniversary falls on November 17, the campus will hold a fun competition on the weekend of November 14 in advance.

First of all, the principal would like to thank ACC and wish ACC a happy birthday! Thanks to the founder, Master Huili "Monk dad" for establishing ACC and benefiting many African children! After the thanksgiving prayer, the event kicked off.

Early in the morning, the red and blue teams were full of vigor. There were 200 teachers, babysitters, volunteers, and children. They cheered loudly and yelled at each other. The atmosphere of the event was stunned. The mc, teacher Pieters was also very excited, the whole campus is full of bustle and joy.

Competition events include relay racing, race walking, walking with a spoon that holds a stone, hula hooping, jumping bag racing, and small bowling.

Although the strength of the two teams is slightly different, the cheerleaders are very energetic and hardworking. They have exerted their motivation and encouragement to the extreme, which is also one of the highlights of the event.

The celebrations ended at 11:50 and the blue team really lived up to the expectations and took the top spot. The children and their friends had a great time. Not only did they exert the spirit of teamwork, they also learned the athletes' demeanor. We will be happy to see you next year!
